

Creighton School of Dentistry Building Tour

Join us for networking and a tour of Creighton University's new School of Dentistry, followed by happy hour. The 200,000 sq. ft. \$84.5 million project will increase the number of patients from 12,000 annually to 15,000.

The project is being construction by Omaha-based MCL Construction and is designed by RDG Planning and Design.

It will include expanded pediatric services, an Interdisciplinary Health Practitioner Office, uniting the School of Dentistry, School of Medicine, School of Pharmacy and Health Professions and College of Nursing. This new facility will offer a wider range of services to patients, along with a Digital Technology Center with computer-aided design and manufacturing for students.
