AGC NEBRASKA CHAPTER

Construction Employers Association

Nebraska Building Chapter

SILICA SAMPLING & OBJECTIVE DATA PROGRAM WORKSHOP

Facilitator: Bill Walsh, SGS / Galson
Date: Wednesday, May 30, 2018
Time: 9:00 – 11:00am
Location: AGC Heavy Highway Conference Room
635 S 14th Street Suite 125, Lincoln

AGC has partnered with Construction Employers Association to provide our members with discounted pricing on monitoring equipment and access to a searchable sampling database. Participating contractors can rely on the database to manage employee safety and multiple-contractor activities where job tasks produce respirable silica emissions.

How the program works:

- Members of AGC who elect to participate will have immediate access to rent and purchase testing supplies and submit their own silica sampling results.
- Once a contractor submits task-related sampling data they will be able to access the searchable database.

What will be covered:

- General overview of the program
- How you can sign up
- Opportunity to ask questions

Who should attend:

- Everyone with Safety responsibilities.

Come learn about this Member Benefit!
Click here for more information.
If you are already enrolled in the program, here is a chance to ask questions.

Email Vicki that you plan to attend, vicki@agcnebuilders.com.
Register by May 29.
