

# 2017 CONSTRUCTION LEADERSHIP ACADEMY

---

The Construction Leadership Academy is designed to develop and nurture the leadership talent in the industry through an intense four-month program that includes workshops, mentoring sessions and a practicum to enhance and apply leadership skills. Each participant selected a community service project as their practicum.

The Nebraska Building Chapter wishes to **congratulate** this year's participants and **recognize** the outstanding leadership they are providing for their selected "Model the Way" service projects. Also, we want to **acknowledge** the support each participant received from their mentor as part of the academy.

Nebraska  
Building Chapter

QUALITY PEOPLE. QUALITY PROJECTS.

## Leadership Matters!! It Is Your Competitive Advantage!

The Nebraska Building Chapter's Construction Leadership Academy curriculum is based on five proven practices to guide effective leadership as described in "the Leadership Challenge" a book by Jim Kouzes and Barry Pozner.
